

A friend and business associate sent me a link to this web site:

<http://www.kiddofspeed.com/chapter1.html>

This is a photographic and textual record of a motorcycle ride through the so called Chernobyl "dead zone" in Ukraine. I have found this to be a deeply moving portrayal of the tenuous purchase humanity has upon this earth. I recommend a visit to this site for everyone. There are 27 "chapters" in all, each with just a few pictures, and descriptions of the area, conditions, radiation levels, etc.
