

Apparently, by "The Note is undergoing some changes", you meant "we are sucking the life out of The Note". This is horrible.

[ABC News: The Note Is Ready](#)

After a long hiatus, ABC News The Note, the daily missive from the Political Unit, has been reintroduced, and its a serious loss for political junkies everywhere. Gone is the biting, funny, cryptic and insightful commentary the page has long been known for. What has replaced it is nothing more than a morning "Must Read" list and an evening "Day Book," or list of the next day's events.

What a shame.
